EDUCATION

Bachelor of Technology in Computer Science

PES University | Current CGPA:8.37 | Expected Graduation: May 2027

Aug. 2023 – Present

Bangalore, India

EXPERIENCE

Core Events Member, Neural Hive (AI and ML club)

PES University

Sep 2024 - Present

India

- Worked on AI/ML projects and attended workshops on deep learning.

Core Tech Member, The Alcoding Club (Competitive Coding Club)

PES University

Nov 2024 - Present

India

- Actively participated in coding contests and problem-solving sessions.

Tech Member, IEEE SB

PES University

Aug 2024 - Present

India

- Engaged in ethical hacking, CTFs, and organised workshops and hackathons

Concert Domain, Maaya' 24

PES University

Sep 2024 - Nov 2024

India

- Volunteered in hosting the annual intercollegiate techno-cultural fest of PES University

PROJECTS

Smart Water Management System | *ESP32, Arduino, HTML, JavaScript, WiFi.h, WebServer.h*

- Designed a system to track water usage in real-time using ESP32 and a water flow sensor.
- Developed a web-based dashboard to display real-time flow rates and detect leaks.

CareerWay (AI-based Career Guidance Platform) | *React, Node.js, MongoDB, Gemini API*

- Built a career recommendation system using Gemini API.
- Developed a Tinder-like career exploration UI.
- Implemented a chatbot for roadmap guidance.

Survivor's Instinct (Maze Survival Game) | *Godot Engine, GDScript*

- Developed an action-packed survival game where players navigate a maze filled with deadly traps and monsters.
- Implemented progressive difficulty, weapon system, and survival mechanics to challenge players.

Budget Tracking Software | *Python, Tkinter, SQLite*

- Developed a GUI-based budget tracking application using Python's Tkinter.
- Implemented features to track income, expenses, and generate spending reports.

StreamVibe (Web-Based Streaming Platform) | *React, MongoDB, Node.js*

- Built a streaming platform for video and screen sharing.
- Developed pages for streamers, viewers, and room creation.

CTF Challenge Platform | *Node.js, Docker, Web Security Tools*

- Designed and hosted capture-the-flag (CTF) challenges focused on file obfuscation and cryptography.
- Implemented challenges involving hidden data in images, zip/rar file extractions, and cipher-based puzzles.
- Developed web-based challenges involving hidden website elements and encoded messages.

TECHNICAL SKILLS

Programming Languages: C, Python, JavaScript, Verilog

Web Development: React, Node.js, Express.js, MongoDB (MERN Stack)

Cloud & Backend: Firebase, Vercel

Embedded Systems: ESP32, Arduino

Tools & Platforms: Git, Linux, Docker, Vite

Version Control: GitHub, Git

Statistics & Data Analysis: Python (NumPy, Pandas, SciPy)
